Purchasing renewable energy systems for Net Metering Program

Start Date: February 1, 2019

End Date: February 15, 2019

Nunavut

60 sec

Qulliq Energy Corporation (QEC) would like to remind those interested in the Net Metering Program to consult with QEC before purchasing renewable energy generation systems. Applications to install and connect renewable energy generation systems to QEC's grid must be reviewed and approved by the corporation.

The Net Metering Program has specific parameters that applicants must meet. Applicants must:

- Be a residential customer or municipality (one per hamlet);
- Not be a commercial customer; and
- Ensure renewable energy installation does not exceed 10 kilowatts.

Program details can be found at www.qec.nu.ca/customer-care/net-metering-program.

For power producers not covered under QEC's Net Metering Program, the corporation anticipates launching the Independent Power Producer program in 2019. Further program details will be available on www.qec.nu.ca once available.
