CONSTRUCTION PROJECT MANAGER

IQALUIT, NU – Ref. No. QEC-18-064

This is an exciting opportunity for a resourceful professional with strong project management skills in the construction field, a strategic thinker with demonstrated initiative and organizational abilities, who can manage a variety of construction projects.

Reporting to the Director, Health, Safety, Environment and Facilities, you will provide oversight and coordination of construction for various capital projects meeting key deliverables. You will be responsible for developing and implementing cost effective project plans and schedules for various outsourced turnkey projects.

DUTIES AND RESPONSIBILITIES INCLUDE:

- Develops cost effective plans and schedules for construction and renovation of Capital Projects;
- Manages material resources for construction and all related components, including managing logistical constraints of sealift;
- Oversees performance of all contractors, procures supplies and materials as required, and reviews architectural and engineering drawings to ensure regulatory compliance;
- Tracks and controls pre-award vendor inquires, project schedules, invoice payments, budgets, reports, and rationalizes costs incurred in excess of budgeted amounts due to an underestimation of the actual cost during budgeting;
- Interprets and explains plans and contract terms to stakeholders such as administrative and accounting staff, clients and management;
- Evaluates construction methods and determines cost-effectiveness of plans, and develops and implement quality-control programs;
- Advises on technical inquiries from other departments and contacts;
- Directs the technical quality of the work of contractors;
- Reviews all applicable federal and territorial acts/regulations, laws and codes to ensures the Corporation is in compliance with the applicable legislation;
- Coordinates site inspections based on corporate requirements and in conjunction with the capital plan;
- Ensures all health and safety requirements are adhered to;
- Partners with Environmental Specialist on environmental work such as waste removal, site assessments, site delineations, site cleanups and risk assessments for environmental-related services.

REQUIRED QUALIFICATIONS INCLUDE:

- Bachelor of Structural Engineering, Civil Engineering, Mechanical Engineering, or similar field of study.
- Ten years of experience in project management leading construction projects.
- Experience in designing and costing capital projects.
- Extensive experience in managing budgets for large construction projects.
- Excellent knowledge of full scope project management, including the ability to deliver projects on time, on budget, and within scope.
- Excellent knowledge of regulatory compliance, building construction, materials and methods, and codes.
- Registered Professional Engineer with eligibility for registration in NAPEG.
