Public safety when operating a motor vehicle around power poles and power lines

Start Date: April 19, 2018
End Date: August 31, 2018
Nunavut **45 sec**

Qulliq Energy Corporation (QEC) would like to remind Nunavummiut to exercise caution around power poles and power lines when operating a motor vehicle (including ATVs and snow machines). Please follow these steps to avoid unplanned power outages, serious injury, or death:

- Remember to keep a minimum distance of three meters from power lines.
- Equipment supporting power poles like guy wires or cribs may be covered in snow. Keep a safe driving distance away from the base of power poles. To alert motorists, QEC has installed bright coloured coverings on guy wires in high traffic areas.
- Do not push snow toward base of power poles or create high snow piles near overhead power lines. If a person or motorist comes in contact with a power line, it can cause serious injury or death.

To report a power related emergency, call QEC's 24-hour emergency number at 1-867-222-3807.

QEC would like to thank Nunavummiut for their continued cooperation in using safe practices around power poles and power lines.
