## Overview

Qulliq Energy Corporation (QEC) is wholly owned by the Government of Nunavut and operates in compliance with the *Qulliq Energy Corporation Act*. QEC generates and distributes electrical energy to Nunavummiut through the operation of 25 diesel generation plants in 25 communities. The corporation also provides mechanical, electrical and line maintenance, as well as support services, from three regional centres.

QEC supports the Minister responsible for Qulliq Energy Corporation on regulatory and intergovernmental issues, attends to corporate objectives provided by legislation, and has the mandate to coordinate all contracting, procurement and leasing activities to fulfil all operational requirements of the corporation.

QEC is pleased to present its annual report on contracting, procurement and leasing activities for the 2015-2016 fiscal year. This is the third year a comprehensive report replaced three independent reports as it was previously prepared.

## Procurement Objectives

QEC is committed to ensuring fair value and ethical practices in meeting its contracting, procurement and leasing responsibilities. This is accomplished through effective policies and procedures aimed at:

- Obtaining the best value for Nunavummiut;
- Creating a fair and open environment for vendors;
- Operating with integrity and transparency;
- Maintaining current and accurate information; and
- Ensuring effective approaches to meet QEC's requirements.

The corporation is presenting this document to support the integrity and transparency of its procurement activities. With the release of this information, QEC is bound legally to safeguard competitive information which may prove harmful if disclosed to the public.

QEC strives to fully comply with the reporting requirements of QEC's procurement policies and frame of reference. The information in the report is obtained from various sources and is deemed to be accurate.

Readers should keep in mind that the information presented is based upon contracting, purchasing and leasing records, and may differ slightly from actual payment data.

## NNI Considerations

In 2015-2016, no contracts administered by QEC were evaluated under the GN's Nunavummi Nangminiaqtunik Ikajuuti (NNI) Policy. NNI adjustments provide an incentive

to encourage Nunavut and Inuit owned businesses to respond to QEC contract proposals and tender opportunities. At the time of writing, QEC is reviewing its corporate obligations under Article 24 of the Nunavut Land Claim Agreement as adopted by the Government of Nunavut and NTI. The corporation will be implementing the NNI Policy effective April 1, 2017.

### Structure of this Report

This report is divided into five sections and summarizes all contract, procurement and leasing activities for the corporation for the 2015-2016 fiscal year:

**Section 1** Service Agreements

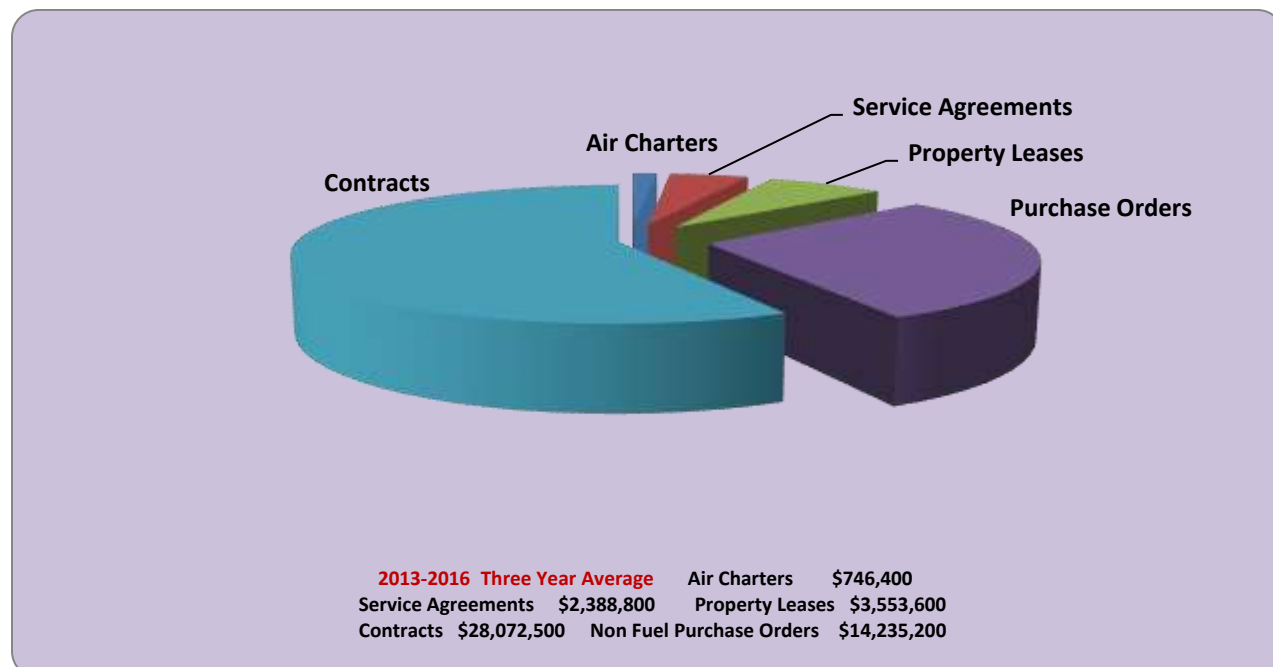

**Section 2** Contracts

**Section 3** Air Charters

**Section 4** Purchase Orders

**Section 5** Leases

### Contracting & Procurement –Three Year Average Comparison

## Section 1 Service Agreements

Service agreements are normally used by QEC for the procurement of services other than the provision of goods and construction.

In the 2015-2016 fiscal year, 34 service agreements were issued for more than \$25,000. Overall, 88%\* of these agreements were acquired through the tender or Request For Proposal (RFP) and Request For Quotes (RFQ) processes, including Service Offer Agreements of the GN. One service agreement was signed with a value exceeding \$100,000 for pipeline design services in Rankin Inlet. Service agreements are used primarily for maintenance type services and quite often are for multiple communities or regions.

### Service Agreements by Value

Type	2015/16			2014/15				
	Number		Value	Number		Value		
Up to \$10,000	10	8%	80,774	3%	7	12%	56,566	2%

Total	119	100%	2,552,900	100%	58	100%	3,960,717	100%

## Section 2 Contracts

Contracts are used primarily for the purchase of capital assets. These assets are acquired for project construction and large scale installations and are traditionally awarded by invitational and public tender.

The majority of contracts issued in 2015-2016 were greater than \$100,000 and were primarily the result of work performed at a number of power plants. Of these contracts, \$15,687,000 was for the construction of the new diesel power plant in Pangnirtung. In addition, major contracts were issued for equipment replacement and installation in Hall Beach, Clyde River and Cambridge Bay. The data presented is for values at the time the contract was awarded. The award is a static value and may not reflect what was actually paid to a vendor throughout the life of a contract.

### Contracts by Value

Type	2015/16			2014/15				
	Number		Value		Number		Value	
Up to \$25,000	1	3%	6,305	-	3	14%	43,000	-

Total	37	100%	33,381,699	100%	21	100%	23,125,748	100%

### Section 3 Air Charters

Air travel by QEC employees is typically provided by commercial airlines. It is the policy of QEC to only charter aircraft when more economical travel is unavailable or impractical. QEC charters aircrafts to address urgent power plant repairs or to meet urgent operational requirements.

Air charters represent the smallest group of procurement activity for QEC. However, in 2015-2016, significant charter expenses were incurred to respond to a fire at the power plant in Pangnirtung and to transport equipment to Qikiqtarjuaq and Taloyoak in order to build new power plants.

#### Air Charters by Value

Type	2015/16			2014/15				
	Number		Value	Number		Value		
Up to \$9,999	12	28%	92,710	7%	10	26%	79,334	12%

Total	43	100%	1,300,012	100%	38	100%	641,177	100%

## Section 4 Purchase Orders

QEC uses purchase orders to support payment for contracts, services, supplies and equipment, as well as fuel, for the corporation. Purchase orders account for a significant portion of procurement activity. The tables below summarize purchase orders valued at \$5,000 or more, including those issued for services rendered as a result of amendments to service or construction contracts. Purchase orders for fuel used in QEC's power plant operations account for approximately \$50 to \$60 million each year.

### Purchase Orders by Value

Total	475	100%	66,347,367	100%	463	100%	71,489,165	100%

## Section 5 Leases

The majority of leasing activity by QEC is for the purpose of employee accommodation. As shown in the following table, 96% of all leases are classed as residential. The tight housing market in Iqaluit, as well as in the regional centres, has resulted in significant increases in housing costs and is considered when leases are renegotiated.

The majority of leases have an annual value of less than \$50,000. The procurement of new leases and the renewal of existing leases are done by public invitation through QEC's Property Management division. Property developers that have space available are regularly surveyed for unit availability and prices to meet QEC's ever evolving housing needs.

### Leased Property by Value

Type	2015/16			2014/15				
	Number		Value	Number		Value		
Up to \$49,999	104	96%	3,480,030	97	96%	3,186,090	90%

## Terminology

This listing is intended to assist the reader with definitions for QEC's technical procurement and contracting terms used in this report.

*Goods:* In this report, "Goods" refer to contracts for purchased goods that are primarily entered into by QEC using a purchase order.

*Services:* refer to contracts for the purchase of services and are primarily entered into by QEC using a service agreement or service contract.

*Service Agreements:* are considered contracts for the delivery of services other than the provision of goods and construction.

*Contracts:* in the QEC context are used primarily for the purchase of capital assets (assets acquired for construction projects and large scale installations) and are awarded by invitational or public tender.

*Request for Tenders and Public Tenders (used interchangeably):* are used when the anticipated cost will exceed \$125,000, QEC knows exactly what it is looking for, and it is seeking the best price to purchase that particular good or provide that specific service. It is a bidding process that is open to all qualified bidders and where the sealed bids are opened in public for scrutiny and are chosen on the basis of price and quality. Also called a competitive tender or open tender.

*Invitational Tender:* are those tenders for which tender documents are sent only to contractors or suppliers specifically selected to submit tenders.

*Request for Proposal (RFP):* is the process used to acquire goods or services when QEC knows what it needs as an end result, but not necessarily how best to achieve it. Therefore the Corporation seeks proposals on methods, ability and price and can negotiate the best method to achieve the best value.

*Invitational RFP:* are those RFPs for which proposal documents are sent only to contractors or suppliers specifically selected to submit proposals.

*Request for Quotes (RFQ):* is the process used to obtain a price for a known commodity and is used primarily in the purchase of goods and services.

*Invitational RFQ (IRFQ):* are those RFQs for which quote requests are sent only to specific suppliers.

*Standing Offer Agreements (SOA):* are price agreements between QEC and a supplier wherein the supplier agrees to provide, on demand, specified goods or services under specified conditions during a set period at a defined price or discount structure and were established through public competitive processes. QEC is also able to access SOA's issued by and available to the GN.

*Sole Source:* A sole sourced contract or purchase is one in which the Corporation believes, on reasonable grounds, that one of the following is applicable:

- i. The goods, services, or construction are urgently required and delay would be injurious to the public interest; or
- ii. Only one party is available and capable of performing the contract; or
- iii. The contract is an architectural or engineering contract that will not exceed \$25,000; or
- iv. Any other type of contract that will not exceed \$5,000 in value.
